Council Hears Discussions Of  
Oil By Rival Ex-  
perts

MEAT MATTER PUT OFF

Uninteresting Meeting Held  
For Considering Unfin-  
ished Business.

The council met Thursday night  
for considering unfinished business  
and while much discussion of two  
or three propositions was indulged  
in, but little was done. The principal  
matter was the preparation of an  
ordinance regulating meat in-  
spection. All of the butchers were  
present and also Mr. S. L. Cowherd,

who is willing to construct an  
abattoir, and Mr. Lee Ellis, who is  
considering the erection of a cold  
storage house for the use of the  
meat men. Progress was reported,  
but the matter was postponed till  
another meeting.

The council decided to make a do-  
nation to the Baseball Association of  
an amount equal to the license of the  
carnival next week.

No action was taken on the appli-  
cation of J. H. West for a permit to  
erect a frame building on Third and  
Liberty streets for a livery stable.

Adjacent property owners protested.  
An appropriation of \$670 was au-  
thorized for regrading South Vir-  
ginia street from Sixteenth to  
Twenty-first streets. Mr. Sanders,  
of the Indian Refining Co., and Mr.  
Stagg, of the Standard Oil Co. ad-  
dressed the council on the use of  
street oils and gave much expert in-  
formation. They presented sealed  
proposals to the council, their prices  
being about the same, ranging from  
4 1/2 to 4 3/4 cents per gallon for differ-  
ent grades of oil. Each was given  
a trial order of one tank for immedi-  
ate shipment, the oil to be used in  
the business sections within the  
next two weeks.

## HUNG JURY IN DETREVILLE CASE

Discharged At Noon Yester-  
day Unable To  
Agree

SEWER CASE BEGUN.

Gee Damage Case Against  
City Goes Out On  
Demurrer.

The trial of the embezzlement  
case against R. H. DeTreville occu-  
pied the attention of circuit court  
most of the week and went to the  
jury Thursday evening.

Speeches were made by four or  
five attorneys, Mr. Smith closing  
for the Commonwealth in a vigorous  
and eloquent speech, one of his  
strongest efforts for a year or more.  
The jury was hopelessly hung from  
the first 11 to 1 for conviction and  
reported yesterday at noon that  
they could not agree and were dis-  
charged. None of the other mill  
cases will be tried at this term.

Yesterday the case of Jas. Gee's  
Admr. vs. City of Hopkinsville was  
argued on demurrer and the demur-  
rer sustained, with leave to amend.  
The case grows out of the drowning  
of James Gee in Little River March  
9, 1910.

The case of Ed Weathers vs. Er-  
ving C. Stevenson, was dismissed  
settled at defendants costs.

Case against E. K. Dewey, embez-  
zlement, was continued till June  
term.

In the case of Commonwealth vs.  
E. Moore the death of defendant  
was suggested and indictment dis-  
missed.

The case of Commonwealth vs.  
Hadden and others, appeal from  
city court, was set for 28th day.  
Also case against Sam Frankel,  
known as automobile case, set for  
same day.

Houston Morris vs. R. T. Stowe,  
passed and will be tried later.

Ida Simmons, Foster and others,  
damage suit against Hopkinsville  
Sewerage Co., was entered into yes-  
terday. Plaintiffs sue for alleged  
damages resulting from the location  
of defendant's septic tank near their  
property.

## Mrs. Clark's Funeral.

Funeral services of the late Mrs.  
Harriet Clark were held at the  
Christian church Thursday morning  
at 11 o'clock by Rev. H. D. Smith  
and the body was laid to rest in  
Riverside cemetery.

## Improved Hickory King Corn

My attention was first called to Hickory King  
Corn twelve or fifteen years ago.

It was claimed to produce more corn, NOT COBS  
AND STALKS, especially on thin land, than any other  
variety. I had been planting the different varieties  
grown in this section, Middle Tennessee and North  
of Ohio River. Each had its serious defects, too much  
cob, too long maturing or too chaffy, and each had  
too many nubbins, or ears not filled out. I did not  
like especially the first crop of Hickory King Corn I  
raised. The ears were most too small, and not  
enough stalk.

The next year I crossed it with Huffman, giving  
it more stalk and longer ears, and still retaining the  
large, deep grains with a slightly larger cob. Since  
then I have not planted any other corn on the farm,  
and have done all I could to prevent its mixing with  
my neighbor's corn, many of whom plant this  
variety.

In a test made at the Iowa Experimental College  
some years ago this corn shelled out most pounds of  
corn per bushel out of thirty varieties. On account  
of the small cob, this corn did not sour in the shock  
in the fall of 1906 during the wet harvest, so there  
was no trouble about the seed for the 1907 crop,  
while with almost all other varieties the case was  
just reversed. I had no trouble getting a stand of 97  
per cent without testing seed. Samples of several  
varieties of corn were sent to the Agricultural De-  
partment to be tested. The report showed Hickory  
King to be one of the most satisfactory they had  
tested.

Comment by Prof. C. A. Mooers, of the Univer-  
sity of Tennessee, after a few years' test with "Boone  
County White," "Iowa Silver Mine" and fourteen  
others. (See Bulletin No. 89; July 1910, Page 51.)

"Hickory King is said to have originated in Vir-  
ginia. At any rate, it is extensively grown in certain  
counties of that State, and its use is rapidly spread-  
ing throughout Tennessee. The ears are small and  
very thoroughly protected by husks and more than  
one ear is frequently produced on the stalk. The  
grains are so large and flat that when once seen they  
are likely to be remembered. No other variety grown  
at this Station equals this one in the high percentage  
of shelled corn—70 pounds of ear corn as grown un-  
der average field conditions running with 61 to 63  
pounds of shelled corn. None of the other varieties  
surpass it in soundness, and no other has proven its  
equal as a grain producer on either poor or medium  
upland, and its capacity to give high yields even on  
rich land has been demonstrated more than once.  
For example, a block of 16 1/2-acre plots planted at  
the rate of 10,000 stalks per acre on fertile bottom

land at the Station farm averaged in 1909 nearly  
90 bushels of shelled corn to the acre. The chief ob-  
jections urged against it are the hardness of grain and  
the difficulty with which it is husked. Selection and  
breeding may overcome these defects as well as in-  
crease the yield. Also selections are suggested both  
for a one-eared variety for grain and for a prolific  
strain for silage, for which purpose on poor uplands  
it is even now well suited. Failure to plant thick  
enough is not an uncommon cause of unsatisfactory  
yield, especially if ranker-growing and large-eared

varieties, which require wide spacing have so to  
speak, established the rate of planting."

The most prominent seed corn catalogs in the  
country advertise Hickory King Corn, and price it as  
high as any variety except their leaders, for which  
they claim "The earth and the fullness thereof."  
Note the description taken from two of the most  
prominent seedsmen. One out West says: "A  
white variety of field corn which has the smallest  
cob of any in existence, of vigorous habits and a  
splendid and sure cropper, especially well suited to  
light and thin soil. A very desirable variety and  
largely planted in many Southern States. It does  
well in all Northern and Central Western States."

This seems to cover nearly all the corn section.

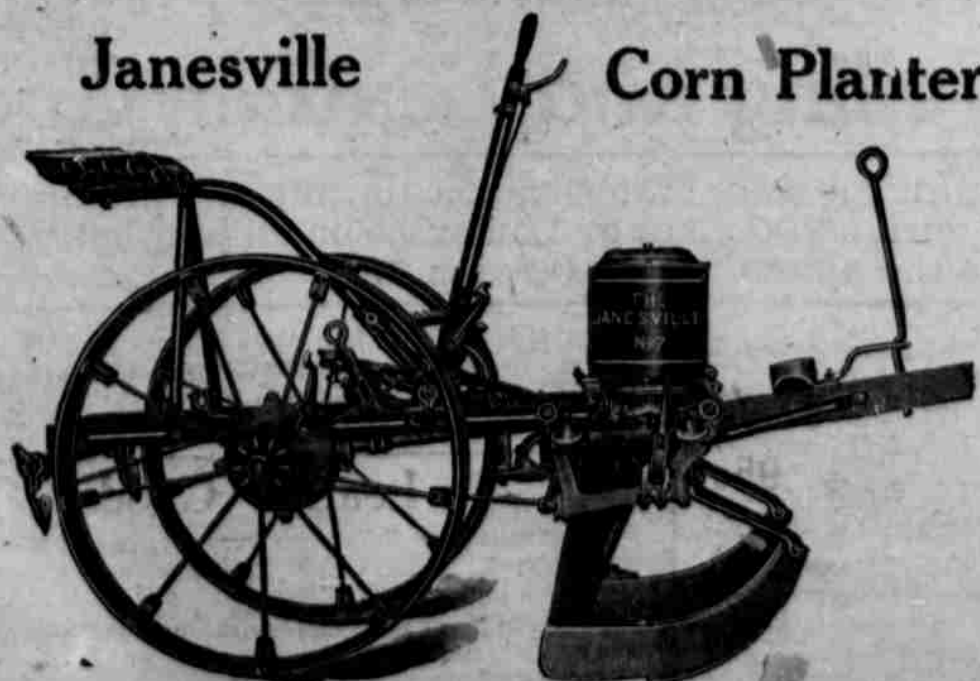

Another local catalogue says, "The ears are  
rather small, but usually two or three on each stalk.  
It is a good yielder. The cobs are small, a single  
grain sometimes being large enough to cover across  
section of cob. The grains are very large, flinty,  
and of the finest quality for milling or feeding."

What else do we want with it? This corn is  
particularly good for early crops and will give satis-  
factory results.

These are correct descriptions of the corn. It  
does not mature so early as some of those Northern  
and Western "leaders," and hence is not so light and  
husky. It matures earlier than the old Willis, the  
most widely known corn here, and will produce more  
and better corn. I know no corn so easy to get a  
stand of. Ears that have been on the ground all  
winter will usually germinate satisfactorily. It will  
stand more exposure than will "Willis" and is as  
satisfactory for meal and feed as any corn grown  
anywhere. The one objection to it is, it shells too  
easily.

I can furnish this Improved Hickory  
King Corn, such as I plant, at \$2.00 per  
bushel.

Corn Planting is a  
**SURE THING**  
When You Use a  
**Janesville Corn Planter**

The Janesville drops two, three or four grains to the hill, just as the soil appears to call for it. Think what this ONE exclusive Janesville feature means in the way of a more even growth and better crops. This change is made without stopping your team or changing a plate. It will hill or drill. Furnished with edge and flat drop.  
OTHER FEATURES:—Automatic distribution of the seed on the reel while winding up. Open or closed wheel. Pitman drive; no lost motion.  
Isn't this the planter you've been looking for? You can't afford not to investigate this machine.
